

D4Science Infrastructure - Incident #10101

Mongo5-p-d4s: full backup not completed after 24h

Oct 30, 2017 09:52 AM - Roberto Cirillo

Status:	Closed	Start date:	Oct 30, 2017
Priority:	Normal	Due date:	
Assignee:	Tommaso Piccioli	% Done:	100%
Category:	System Application	Estimated time:	0.00 hour
Target version:	restore mongo5.p		
Infrastructure:	Production		
Description			
After the mongo5 full resync we have tried to perform a full backup but this backup process takes about 24 hours. I've stopped the process for the moment. We need to understand why this process takes a long time

The mongo backup process is OK now.
I created a new host definition on the backuppc server using a DNS alias of mongo5-p-d4s.d4science.org (mongo-backup.d4science.org) and the full backup takes quite the same time that we have before the full resync of the mongodb.
