Nagios monitoring, MongoDB: increase database size threshold

Oct 30, 2017 10:23 AM - Roberto Cirillo

Status:	Closed	Start date:	Oct 30, 2017
Priority:	Low	Due date:	
Assignee:	_InfraScience Systems Engineer	% Done:	100%
Category:	System Application	Estimated time:	0.00 hour
Target version:	Nagios monitoring		
Infrastructure:	Production		
Description			
It's needed to increase the database size threshold on mongo4-p-d4s. I think we can set the size to 600 GB.			
Why this alert is present only on mongo4-p-d4s?			
If it is not present, could we also add this check to: mongo2-p-d4s and mongo3-p-d4s nodes?			

History

#1 - Nov 02, 2017 02:18 PM - Andrea Dell'Amico

- Status changed from New to Closed
- % Done changed from 0 to 100

I just set the warning threshold at 600000 and the critical one at 800000.

All the mongo servers run the same checks, btw.
