Ansible: clean the smartgears state if the scope change

Oct 30, 2017 06:24 PM - Roberto Cirillo

Status:	Rejected	Start date:	Oct 30, 2017
Priority:	Low	Due date:	
Assignee:	_InfraScience Systems Engineer	% Done:	100%
Category:	System Application	Estimated time:	0.00 hour
Target version:	UnSprintable		
Infrastructure:	Development, Pre-Production, Production		
Description If I change the scope on container.xml via ansible, when the playbook run it doesn't clean the smartgears state. In this way the changes made are not available on the IS when the node is restarted. We should add a task for cleaning the state before restart the smartgears container.

- Status changed from New to Rejected
- % Done changed from 0 to 100

This problem happened only with the old smartgears version. With the new Smartgears version it's working fine.
I've performed a test with the following smartgears version: 2.1.3-4.7.0-154641
