- Related to Task #10434: Please add accounting-insert-rstudio-se-plugin to quota-plugin.d4science.org smart-executor instance added

#2 - Nov 24, 2017 02:54 PM - Luca Frosini

- Blocks Task #10439: Launch accounting-insert-rstudio-se-plugin added

#3 - Nov 24, 2017 03:14 PM - Andrea Dell'Amico

We could face a problem here: we replicated the users home directories on almost all the rstudio instances. We should cleanup the nodes.

#4 - Nov 28, 2017 11:37 AM - Roberto Cirillo

I think this task should be reconsidered. In addition, what happens if an user has more than one home (not duplicated but in different scopes)? Is the plugin able to sum the home of the users? If I remember correctly, this plugin is designed to run only in a single scope where it expects to have only one home for a single user. @luca.frosini@isti.cnr.it do you remember better than me? quota-plugin is running at root-level so, if this is the case, the plugin cannot be deployed at root level.
