D4Science Infrastructure - Task #10748

Reinstall 2 GARR dataminer instances

Dec 18, 2017 05:01 PM - Andrea Dell'Amico

Status:	Closed	**Start date:**	Dec 18, 2017
Priority:	High	**Due date:**	
Assignee:	_InfraScience Systems Engineer	**% Done:**	100%
Category:	System Application	**Estimated time:**	0.00 hour
Target version:	No Sprint		
Infrastructure:	Production		

Description

The one with hostname ip-90-147-167-236.ct1.garrservices.it fails executing jobs correctly even if there's apparently no difference between it and the other installations.
dataminer-genericworkers-5 (as per openstack dashboard) is not able to restart because the hypervisor is out of disk space.

- % Done changed from 20 to 80

Reconfigured. I'll add them again to the corresponding cluster tomorrow, so that I'll sure that all the R dependencies have been installed.

#5 - Dec 22, 2017 01:52 PM - Andrea Dell'Amico

- Status changed from In Progress to Closed

- % Done changed from 80 to 100

The two dataminer have been added back to the load balancer.
