Description			
Please investigate if this is an issue or something no longer needed, with the help of @francesco.mangiacrapa@isti.cnr.it			

History

#1 - Jan 10, 2018 01:02 PM - Andrea Dell'Amico

- Assignee changed from _InfraScience Systems Engineer to Francesco Mangiacrapa

Francesco should know if that file is now managed by the new scripts system. If so, that task can be removed altogether.

#2 - Jan 10, 2018 02:58 PM - Francesco Mangiacrapa

I'm not sure but It seems not managed by the new system ..

That is a CKAN plugin (googleanalytics) and it is missing in the file_installer at:

http://svn.d4science-ii.research-infrastructures.eu/gcube/trunk/data-catalogue/ckan-d4science-extension/2.6/scripts/file_installer

so I suppose that the googleanalytics plugin is still managed via old ansible script. Can you check this @andrea.dellamico@isti.cnr.it?

#3 - Jan 10, 2018 07:58 PM - Andrea Dell'Amico

And I see why. That role is in the public section and not into the d4science-gcube playbook:

```
../library/roles/ckan/ckan/defaults/main.yml:ckan_google_analytics_fixed_file: 'http://svn.research-infrastructures.eu/public/d4science/gcube/trunk/data-catalogue/ckan-d4science-extension/plugins/googleanalytics/plugin.py'
```

We can add that part to the internal playbook or leave it public so maybe someone can use it, who knows. In either case that URL is not correct anymore, that file now lives in ckan-default/plugins/googleanalytics/plugin.py. Your choice (moving it into the internal playbook is maybe more correct).

#4 - Jan 16, 2018 06:00 PM - Andrea Dell'Amico

- Status changed from New to Closed

- % Done changed from 0 to 100

I just changed the subversion URL in the role defaults. That fix could be useful to others too.
