D4Science Infrastructure - Task #10861

Remove VO scopes from all CKanConnector instances

Jan 10, 2018 04:45 PM - Roberto Cirillo

Status:	Closed		**Start date:**	Jan 10, 2018
Priority:	High		**Due date:**	
Assignee:	Costantino Perciante		**% Done:**	100%
Category:	Application		**Estimated time:**	0.00 hour
Target version:	UnSprintable			
Infrastructure:	Production			

Description
In order to avoid to discover a gCoreEndpoint accessible only at VO level from a VRE scope, it's needed to remove the VO scopes from all the CKanConnector instances.

History

#1 - Jan 10, 2018 04:58 PM - Roberto Cirillo

- Status changed from New to In Progress

I'm going to remove the VO scope from the following instances:

- ckan-sobigdata2.d4science.org (SoBigData scope)
- ckan-iotc.d4science.org (D4Research scope)
- ckan-d4s.d4science.org (D4Research scope)

a restart is needed.

#2 - Jan 10, 2018 05:29 PM - Roberto Cirillo

- Status changed from In Progress to Feedback

- Assignee changed from Roberto Cirillo to Costantino Perciante

- % Done changed from 0 to 100

Done. Please, @costantino.perciante@isti.cnr.it could you perform a check?

#3 - Feb 14, 2018 11:07 AM - Costantino Perciante

- Status changed from Feedback to Closed

@roberto.cirillo@isti.cnr.it let me add a comment to this old ticket: in the last release (i.e. 4.10) a patch has been added so that the discovering of the ckan-connector is performed by asking for the one that contains the current context. In case more than one is found, the correct one will be picked.

We can readd the above VO contexts when you can.
