Description			
I need to prepare the smart-grsf-d4s.d4science.org machine with the newly grsf-publisher-ws (just built on etics) available here http://maven.research-infrastructures.eu/nexus/content/repositories/gcube-staging/org/gcube/data-catalogue/grsf-publisher-ws/1.5.0-4.10.0-162096/grsf-publisher-ws-1.5.0-4.10.0-162096.war			
Please consider it is an old smartgears distro with the already encountered logback configuration problem
