

D4Science Infrastructure - Task #10940

Task # 10938 (Closed): Reconfigure geonetwork.geothermaldata.d4science.org

Move the geonetwork.geothermaldata services on a new VM

Jan 15, 2018 06:57 PM - Andrea Dell'Amico

Status:	Closed	Start date:	Jan 15, 2018
Priority:	Normal	Due date:	
Assignee:	Andrea Dell'Amico	% Done:	100%
Category:	Application	Estimated time:	0.00 hour
Target version:	Upgrade to ubuntu 14.04		
Infrastructure:	Production		
Description There are many of them, I don't know if they are all needed: GeoExplorerPortlet GeoExplorerPortletNew geonetwork geoserver geoserver_def GisViewer TestGisViewer

- Blocked by VM Creation #10939: Create a new VM to host the geonetwork.geothermaldata.d4science.org services added

#2 - Jan 25, 2018 08:27 PM - Andrea Dell'Amico

- Assignee changed from Fabio Sinibaldi to Andrea Dell'Amico

@fabio.sinibaldi@isti.cnr.it Do you know what of those services must be migrated?

#3 - Jan 26, 2018 10:40 AM - Fabio Sinibaldi

I'd say we only use geonetwork, but a double check can be done on the IS.
I'll be checking for anything declaring geonetwork.geothermaldata and report here..

#4 - Jan 26, 2018 11:00 AM - Fabio Sinibaldi

I couldn't find any other IS resource declaring that host in EGIP VRE than GeoNetwork ServiceEndpoint.

- % Done changed from 0 to 80

I configured the new node and copied the old geonetwork instance. It answers here:
<http://geonetwork1.geothermaldata.d4science.org/geonetwork/srv/en/main.home> @fabio.sinibaldi@isti.cnr.it are you able to check if it's working? If it's OK, the last step is moving the old hostname to the new node.

#7 - Feb 20, 2018 12:10 PM - Fabio Sinibaldi

New Geonetwork instance seems correctly working : both credentials and results correspond.

#8 - Feb 20, 2018 12:33 PM - Andrea Dell'Amico

Thanks Fabio, I'm going to switch the hostname to the new node.

#9 - Feb 20, 2018 12:38 PM - Andrea Dell'Amico

- *Status changed from In Progress to Feedback*
- *% Done changed from 80 to 100*

Done. We need to give the DNS records some time to propagate.

Keep in mind that I just copied the application, so there's no smartgears running on that VM.
