**Description**

Hi,

I am trying to access the gCore documentation on the wiki (https://wiki.gcore.research-infrastructures.eu), but don't seem to get any response from the server. Perhaps it is down?

Regards,
Rob

*- Status changed from New to Rejected*

gCore wiki was migrated to https://gcore.wiki.gcube-system.org since 2010, I don't know if there was
a redirection on wiki.gcore.research-infrastructures.eu that is no more working now.

Thanks for the new url. It might be good to update the links in this web page though:
https://gcube.wiki.gcube-system.org/gcube/GCube_Documentation.
