<b>Description</b> Today we're going to deploy in production the 2 portlets for training presented at the last TCom. In order for them to work we need to add a postgres DB to the infra postgres cluster? VM and to create the related service endpoint resource at VO Level (D4Research VO)  @francesco.mangiacrapa@isti.cnr.it can give you more details about this.

#### History

##### #1 - Feb 15, 2018 10:44 AM - Francesco Mangiacrapa

Pastgres DB has already been created also for production environment. You find more details at #10918  
You must create a Service Endpoint (called 'TrainingCourseAppDatabase') under the D4Research VO and copy it to VREs where necessary.

Anyway, you can copy configurations of the following dev SE:

```
<ID>4991d472-cca3-49df-8b1c-10865cb6a91e</ID>
```

```
<Type>RuntimeResource</Type>
```

```
<Scopes>
```

```
<Scope>/gcube/devsec/devVRE</Scope>
```

```
</Scopes>
```

```
<Profile>
```

```
<Category>Database</Category>
```

```
<Name>TrainingCourseAppDatabase</Name>
```

```
....
```

I can create it by myself, @roberto.cirillo@isti.cnr.it, let me know..

##### #2 - Feb 15, 2018 11:37 AM - Roberto Cirillo

- Status changed from New to In Progress

##### #3 - Feb 15, 2018 11:40 AM - Roberto Cirillo

- Status changed from In Progress to Feedback

- Assignee changed from Roberto Cirillo to Massimiliano Assante

- % Done changed from 0 to 80

The requested resource has been created in D4Research VO. Please, @massimiliano.assante@isti.cnr.it tell me when the new VRE is ready, in order to add this new resource to the new VRE.
