| <b>Description</b><br>The hook to export any user to the related LDAP group upon join/leave any VRE is ready to be deployed. This removes the limitation where users have to wait until 10 minutes before being authorised on any external service using LDAP (e.g. Redmine, Sharelatex, 3M) |                      |             |              |
