D4Science Infrastructure - Support #11417

Social tool / news feed; can you add paging (e.g. 20 items) and expiration dates?

Description

Opening a VRE; I see an endless news feed, and some very old ones.

Can we add a paging (to e.g. top 20 items) and an automated expiry date?

(as you understand, I spent the weekend cleaning my attic, an discovered that a management policy on storage prevents a lot of dust from accumulating)

- Status changed from New to Rejected

The News feed returns the first 20 posts in reverse chronological order (from the newest to the oldest). "Pagination" is automatic and implemented by means of the mouse scroll: (like in any other social) the more you scroll down the page the more posts are retrieved still n reverse chronological order. Posts do not and should not expire.
