- % Done changed from 0 to 100

The portlet was not deployed successfully but it returns an error: Persistence error on UserReference creation

<https://bluebridge.d4science.org/group/wecafc-firms/regional-data-collections>

here's the log.

```
[PORTAL] 1277668512 [http-bio-9090-exec-194] INFO gr.cite.bluebridge.endpoint.EndpointManager - Initilizing Endpoint Manager with refresh interval 180 minutes
[PORTAL] 1277668513 [http-bio-9090-exec-194] INFO gr.cite.bluebridge.endpoint.EndpointManager - Returned 1 service endpoint(s)
```

Perhaps requires web server restart? @vfloros@cite.gr @dkatris@di.uoa.gr

#7 - Mar 28, 2018 03:31 PM - Vassilis Floros

I think you are viewing this error in the UI. Please, can you clear your cahce and refresh the page? Does it appear again?

We are performing tests on the portlet right, now. It seems to work fine but give us some more time to repeat the whole process 2 or 3 times and confirm everything is OK.

#8 - Mar 29, 2018 05:15 PM - Vassilis Floros

The issue that caused the error to appear in the UI is resolved.

The service was redeployed, the portlet was tested again and it works as required.

Thank you for the collaboration.
