Description

We have a list of users that should be added to the dnet VRE to be enabled to use SVN.
Is there a way to do it in bulk (given a list of emails and/or user names) instead of having to manually select one by one each user I want to add?
I can't see a relevant menu item under "Administration", but I might be missing some useful shortcuts :-)

What do you mean by manually select one by one each user I want to add? manually select from where?

#2 - May 02, 2018 11:17 AM - Andrea Dell'Amico

From here: https://services.d4science.org/group/dnet/add-existing-users

- Status changed from New to Closed

The page linked by Andrea lists all the accounts and allow to select the ones to be added. There is no facility to provide a list of usernames matching in the table and adding them all at once.
