<b>Description</b>			
I just recognized that for a paper submission apa6 CTAN package is needed (i was using apacite) <a href="https://tex.stackexchange.com/questions/2628/how-to-apa-6th-in-latex">https://tex.stackexchange.com/questions/2628/how-to-apa-6th-in-latex</a>			
Is it possible to install it?			

#### History

##### #1 - May 07, 2018 05:05 PM - Luca Frosini

- Priority changed from Urgent to Normal

The apa6 package is available here:

<https://www.ctan.org/pkg/apa6>

The same functionality are also provided by

<https://www.ctan.org/tex-archive/macros/latex/exptl/biblatex-contrib/biblatex-apa/>

@luca.frosini@isti.cnr.it I forgot the details. Did we find a package to install?

@andrea.dellamico@isti.cnr.it one of the two links in my previous comment. Are them packages?

##### #5 - Jul 03, 2018 05:12 PM - Andrea Dell'Amico

Yes, but the part that I did not understand is if it's part of some other collection. There's no stand alone debian package.

If you are able to test a compilation, I'm trying to install some deb packages that are referenced: texlive-bibtex-extra, biblatex-dw, texlive-publishers

Well, I installed the full texlive distribution. Now everything packaged and latex related is installed. @luca.frosini@isti.cnr.it if you can test let me know the results.

##### #7 - Jul 05, 2018 12:34 PM - Luca Frosini

It seems not working as I expected.

Just adding

```
\usepackage{apacite}
```

The compilation provides a lot of errors.

Reading the documentation I have the feeling that is not just a matter of using a package but I should completely change the document class.

<http://ctan.math.utah.edu/ctan/tex-archive/macros/latex/contrib/apa6/apa6.pdf>

Anyway, textlive is very useful for a lot of other packages I need, such as the support of italian language in babel which i confirm that now work. Thanks a lot.

I'm going to close the ticket.
