<b>Description</b>			
In this example "Scientific advice" and "State and trend of marine resources" are not consistently referenced as now it is for abundance level and fishing pressure. They all should contain in square brackets "[ ]" data owner and database source, ref year and rep year (when available)

@marketak@ics.forth.gr @minadkn@ics.forth.gr can you provide me an example of JSON so I can investigate the issue?			
I have an example of attached JSON but I don't have such a fields

As reported from @aureliano.gentile@fao.org "in state an trend of marine resource the reporting year is still missing, the rest looks fine. In fact by checking the json file that information is missing":

```
"state_and_trend_of_marine_resources" : [ {  
  "value" : "The stock has been on an increasing trend since 2007 and is considered by ICES to be at full re  
productive capacity. Spawning stock biomass was estimated at 2.0 million tonnes in 2013, i.e., well above both  
the precautionary reference point Bpa (1.3 million tonnes) and management plan's upper trigger of (1.5 mill  
ion tonnes). Fishing mortality increased in recent years but is still well below the management plan target Ft  
rp and FMSY. However, the stock is considered to continue in a low productivity phase " the series of weak r  
ecruitment since 2002 is the lowest observed (ICES, 2013a). [Data Owner: International Council for the Explo  
ration of the Sea, DB Source: FishSource]",  
  "reference_year" : -1  
} ],
```
