Description

Natively the CKAN template does not show a loading facility (i.e. a spinner as popoup) during the page loading.
It should be added in order to improve the user experience during the catalogue browsing.

- Status changed from In Progress to Closed

- % Done changed from 80 to 100

This facility has been released in production. It is available for all CKANs.
Unfortunately, at the moment **it does not work with the browser Safari**. I hope to solve this compatibility issue against the browser Safari in the future.

@aureliano.gentile@fao.org just to notify you that the above enhancement is available for GRSF's Catalogue

Thanks a lot, I see it in Firefox, not in Chrome. But it might be my persistent browser cache. Anyway thanks a lot!
