<b>Description</b>			
<p>I need to retrieve through R the URL of some files that are stored in the WS.</p> <p>The function "getPublicFileLinkWS" (<a href="http://svn.research-infrastructures.eu/public/d4science/gcube/trunk/data-analysis/RConfiguration/RD4SFunctions/workspace_interact.ion.r">http://svn.research-infrastructures.eu/public/d4science/gcube/trunk/data-analysis/RConfiguration/RD4SFunctions/workspace_interact.ion.r</a>) enables to retrieve the Public Link. Is there such function to retrieve the Link (i.e. the URL that redirects to the file on the WS, hence, with the need to login to access the file)? If not, is it possible to create it?</p> <p>Thanks, Paul</p>

Hi,  
Any information on this ticket? The objective for me is to provide some links to the data through the catalogue, with the need for the user to connect to the VRE in order to download the data (as the data are not necessarily public). The workflow to publish the data is written in R, this is why I would need such R function.  
Thanks,  
Paul

Hello Paul,  
there is not GetLink REST API. We could add it in the next release meaning will be available in July. Please take into account that you will also need to specify the base URL of the gateway though (e.g. <https://bluebridge.d4science.org>, or <https://i-marine.d4science.org>).

Paul, If the timing is ok with you we can schedule the activity. Please let me know.

I would actually be interested to have this function to use it on my workflow. By July it is fine for me.  
Thanks
