Description

Legacy and GRSF stock records have been published smoothly.

However when we try to publish GRSF fishery records most of them (in the 99 %) of the cases the publishing fails with no error messages.
More specifically the response is the following:

An error occured while publishing records for grsf
gr.forth.ics.isl.grsfservicescore.exception.GrsfPublishingException: Fatal transport error
at gr.forth.ics.isl.grsfservicescore.GrsfPublisher.publishRecord(GrsfPublisher.java:112)

Caused by: java.lang.Exception: Method failed: HTTP/1.1 500 Internal Server Error; Response body:

The json contents of an indicative record that fails are attached

It seems related to a typo (a had 'fishing uni' without the t) and this causes the issue.
I'm going to fix it and redeploy the service

@roberto.cirillo@isti.cnr.it I fixed such an issue. Can you please redeploy GRSF web service in production?
