

D4Science Infrastructure - Incident #12043

ckan-grsf-admin2: more memory is needed

Jun 26, 2018 02:48 PM - Roberto Cirillo

Status:	Rejected	Start date:	Jun 26, 2018
Priority:	Urgent	Due date:	
Assignee:	_InfraScience Systems Engineer	% Done:	100%
Category:	Application	Estimated time:	0.00 hour
Target version:	UnSprintable		
Infrastructure:	Production		
Description The smartgears container has been killed by system this night at 3 a.m. I've tried to restart the container but the container doesn't start and the cattalina.out show the following: <pre># There is insufficient memory for the Java Runtime Environment to continue. # Native memory allocation (mmap) failed to map 1973026816 bytes for committing reserved memory. # An error report file with more information is saved as: # /home/gcube/tomcat/hs_err_pid19761.log Java HotSpot(TM) 64-Bit Server VM warning: INFO: os::commit_memory(0x000000008a660000, 1973026816, 0) failed; error='Cannot allocate memory' (errno=12) # # There is insufficient memory for the Java Runtime Environment to continue. # Native memory allocation (mmap) failed to map 1973026816 bytes for committing reserved memory. # An error report file with more information is saved as: # /home/gcube/tomcat/hs_err_pid19838.log</pre> Is it possible to increase the memory on this host?
