D4Science Infrastructure - Task #12087

Remove services from Edison VO

Jul 02, 2018 02:32 PM - Roberto Cirillo

Status:	Closed		**Start date:**	Jul 02, 2018
Priority:	Normal		**Due date:**	
Assignee:	Roberto Cirillo		**% Done:**	100%
Category:	Application		**Estimated time:**	0.00 hour
Target version:	EDISON goodbye			
Infrastructure:	Production			

Description

It's needed to remove the Edison scope from the following services:

```
accounting-service1.d4science.org
accounting-service2.d4science.org
accounting-service3.d4science.org
catalogue-ws.d4science.org
resource-registry1.d4science.org
resource-registry2.d4science.org
node44.p.d4science.research-infrastructures.eu
storagehub1.d4science.org
workspace-repository-prod1.d4science.org (HL webapp)
socialnetworking1.d4science.org
registry.d4science.org
sdi.d4science.org
thredds.d4science.org
```

In addition this scope should be removed from all the dataminer instances currently deployed in production

#3 - Jul 02, 2018 04:45 PM - Roberto Cirillo

- Status changed from New to In Progress

On node44.p.d4science.research-infrastructures.eu (VREModeler service, not provisioned), the scope will be removed manually.
While, in the other services, the scope will be removed from ansible-playbook and the changes will be applied during the next downtime, planned for gCube 4.12.

#4 - Jul 02, 2018 04:54 PM - Roberto Cirillo

- % Done changed from 0 to 10

node44.p.d4science.research-infrastructures.eu removed

#5 - Jul 02, 2018 05:22 PM - Roberto Cirillo

- % Done changed from 10 to 40

scope removed from ansible-playbook.
We should also remove the Edison key from the playbook.

#6 - Jul 02, 2018 08:05 PM - Andrea Dell'Amico

- % Done changed from 40 to 80

#11 - Aug 29, 2018 04:01 PM - Roberto Cirillo

- Status changed from In Progress to Paused

- % Done changed from 80 to 90

Removed from Edison VO the following services:

```
socialnetworking1.d4science.org
catalogue-ws.d4science.org
```

Now, only the dataminer instances are still running under Edison VO. The dataminer scopes will be updated when the new VO is active: the Edison VO will be replaced with a new VO. In this way, in one shot we could remove the old one and add the new one to the dataminer instances.
