<b>Infrastructure:</b>	Production		
<b>Description</b> The enabling services of the root-VO will be recycled from enabling services of Edison VO. It's needed to create an alias for the following VM:  collector-edison.d4science.org registry-edison.d4science.org  The alias will be respectively:  collector-pred4s.d4science.org registry-pred4s.d4science.org

- % Done changed from 100 to 0

I'm going to re open this ticket because now the enabling VMs previously dedicated to Edison VO should be dedicated to the new VO D4OS: [#12345](#).

Is it possible to change the aliases above from:

collector-pred4s.d4science.org to collector-d4os.d4science.org

and from:

registry-pred4s.d4science.org to registry-d4os.d4science.org

Aliases substitution done. The DNS zone should be updated in few minutes.
