D4Science Infrastructure - Task #12226

Nagios: remove replicaset checks from mongo-p-vol.d4science.org

Jul 24, 2018 10:10 AM - Roberto Cirillo

Status:	Closed		**Start date:**	Jul 24, 2018
Priority:	Low		**Due date:**	
Assignee:	Roberto Cirillo		**% Done:**	100%
Category:	System Application		**Estimated time:**	0.00 hour
Target version:	Nagios monitoring			
Infrastructure:	Production			

Description		
mongo-p-vol.d4science.org VM hosts a standalone mongodb instance. The replicaset nagios check are not compatible with this kind of instance. Could you remove these checks?

- Related to Task #12215: Increase disk space on mongo-p-vol.d4science.org added

#2 - Jul 24, 2018 06:25 PM - Tommaso Piccioli

- Assignee changed from _InfraScience Systems Engineer to Roberto Cirillo

- % Done changed from 0 to 80

Specific nagios group created to check standalone mongodb implementation.
Waiting for a user "nagios" to run the authenticated checks

#3 - Jul 25, 2018 09:48 AM - Roberto Cirillo

- Status changed from New to In Progress

#8 - Jul 27, 2018 10:38 AM - Roberto Cirillo

- % Done changed from 80 to 100

As explained here #8788 the check is working now but when the authenication will be enabled with the new SCRAM-SHA1 mechanism, it will be necessary to upgrade the pymongo tool used by nagios. For the moment, I'm going to close this ticket.
