And now the number is 29 as I just deployed a new VRE named FIT4RRI

I'm not the VREModeler owner and I don't know how it works but my suspect is that the missing VREs are simply expired.

The default expired date in the VREDefinition portlet is set to one year.

In addition, all the VRE present in the VREManager portlet are not very old.

Could that be the case here?

Nope, the expired VREs would appear and be listed as Expired/Undeployed.

I'm going to create a test VRE on FARM that will expire after one day. In this way I can verify if the new VRE will be present under "Disposed VRE" list as expected.

#9 - Oct 24, 2018 11:52 AM - Roberto Cirillo

TestVRE created on FARM, it will expire tomorrow. Now it is present under "deployed VREs" list as expected.

#10 - Oct 25, 2018 12:18 PM - Roberto Cirillo

- Tracker changed from Incident to Task

The new VRE has been correctly disposed so I guess it isn't an expired problem.

I'm going to change this ticket to Task since the missing VREs are used without any problem.

I guess we should find a way to recreate the VRE in the VREModeler internal state. @lucio.lelii@isti.cnr.it do have you any suggestions?

#11 - Nov 22, 2018 05:08 PM - Roberto Cirillo

- Target version changed from No Sprint to VREModeler issues

#13 - Dec 07, 2018 10:02 AM - Roberto Cirillo

- Status changed from New to In Progress

First, I'm going to fix the following VREs in preprod environment:

- preVRE
- Dorne

#14 - Dec 07, 2018 11:09 AM - Roberto Cirillo

preVRE and Dorne VRE have been fixed properly.

Dorne was not present on ResourceManager internal state instead preVRE was present.

For preVRE I've cut the ScopedResources defined on VRE Generic Resource as done in Dorne and, in addition, I've manually removed the serialized internal state on ResourceManager service. After that, I've recreated both the VREs by VREModeler and pasted the ScopedResources on

their respective GenericResources.

Now such VREs are back on VREModeler and the new expiration date on Dorne and preVRE now is fixed to Fri, Dec 6, '30.

Now I'm going to restore the VREs under FARM VO. @massimiliano.assante@isti.cnr.it what expiration date do you suggest?

#15 - Dec 07, 2018 11:13 AM - Massimiliano Assante

Thanks, i suggest an expiration date of at least 5 years. 15/02/2024

This is the list of all the VREs that are present only on infrastructure-monitor and that should be restored on VREManager:

ARDAG_Aquaculture
AlieiaVRE
AquaMaps (is it really needed?)
Aquabiotech
CFE_DATA
CWP_Secretariat
CollabResearch
EllinikaPsariaVRE
ForkysVRE
GALAXIDI
GRSF
GRSF_Admin
MARKELOS_Aquaculture
NHREUS_Aquaculture
STRATOS_AQUACULTURES
SustainableBlueEconomy
iLKNAC_Aquaculture
iMarineBoardVRE

Please @massimiliano.assante@isti.cnr.it could you check if all these VREs should be restored on VREManager? Maybe there are some VREs that have been already dismissed.

iMarineBoardVRE is back.

Finally, all the VREs have been successfully restored. I'm going to re assign this ticket to @massimiliano.assante@isti.cnr.it since there is a pending question on the following VREs:

EllinikaPsariaVRE

AlieiaVRE

ForkysVRE

There is a confusion here Roberto, look at the VO!, at the time of the ticket (June 2017) we moved the 3 VREs above (Ellenika etc.) from gCubeApps VO to the FARM VO. This ticket was about the fact that these 3 VREs wouldn't undeploy from gCubeApps VO.

It's correct but if you look the VREManager in gCubeApps VO you can notice that these VRE are not present anymore there but the ticket [#9115](#) is still open.

Are there disappeared?

By reading the ticket [#9115](#) it seems that on July 3 2017 You removed these VREs manually then put the ticket on pause because not all the resources were correctly cleaned. Ans you were supposed to try to recreate the VREs and delete them in a correct way.

Guess this is why the ticket was not closed :)
