is-exporter.d4science.org contains accounting-aggregator plugin instead of the is-exporter plugin.

I stopped the container and removed the plugin.

The machine should contain is-exporter plugin.

The container can be stopped because I stopped the resource-registry until the next upgrade see [#12270](#)
If there are some nagios check about you stop them.

I'm going to close this ticket giving that the playbook will be changed for other reasons
