Target version:	new Vo creation: D4OS			
Infrastructure:	Production			

Description

It's needed to remove the old Edison scope and to add the new Vo scope D4OS to all the dataminer instances.

In particular, we should provide a new ansible role in order to do the following steps:

- remove the Edison scope
- remove the old Edison key
- add the new D4OS VO scope
- add the new D4OS key
- upgrade the library common-scope-maps to the 1.0.9-4.13 version

It's needed to add the garr instances deployed at Palermo site.
At this moment only ip-90-147-188-138.pa1.garrservices.it is running under D4OS VO.

Done. I also added a task to force the removal of the state directory from inside the main playbook so there's no need to run another one. To activate the task, the option "-e 'smartgears_force_remove_state=True'" must be passed to the playbook command line.

OK, thanks. Now I see only these VM from Palermo site running under the new VO D4OS:

```
ip-90-147-188-127.pa1.garrservices.it
ip-90-147-188-134.pa1.garrservices.it
ip-90-147-188-138.pa1.garrservices.it
```

Could you run the playbook using the dataminer_garr_genericworkers_ubuntu group ?

The missing hosts are the following:

```
ip-90-147-188-144.pa1.garrservices.it
ip-90-147-188-141.pa1.garrservices.it
```

```
ip-90-147-188-145.pa1.garrservices.it
ip-90-147-188-123.pa1.garrservices.it
ip-90-147-188-146.pa1.garrservices.it
ip-90-147-188-147.pa1.garrservices.it
ip-90-147-188-139.pa1.garrservices.it
```

It's running.

#10 - Sep 05, 2018 02:34 PM - Roberto Cirillo

- Status changed from Feedback to Closed

- % Done changed from 80 to 100

Now all the instances are running under D4OS VO.
