

D4Science Infrastructure - Task #12461

Cleanup the mongodb ansible roles and the playbooks under d4science-gcube

Sep 12, 2018 12:20 PM - Andrea Dell'Amico

Status:	Closed	Start date:	Sep 12, 2018
Priority:	High	Due date:	
Assignee:	_InfraScience Systems Engineer	% Done:	100%
Category:	System Application	Estimated time:	0.00 hour
Target version:	Mongodb: enable and enforce TLS		
Infrastructure:	Development, Pre-Production, Production		
Description <ul style="list-style-type: none">• The correct role is mongodb-org-3.2.yml, all the other ones must be removed and that one renamed• The used playbook is mongodb-org.yml. It can be renamed to mongod.yml and removed the duplicate calls to some roles (data_disk, nagios)• The mongo_vol group must be split between prod and dev, and the mongo vol nodes added to the main inventory files. <p>The mongo playbook should be changed, in future, to:</p> <ul style="list-style-type: none">• Distribute the configuration• Manage the users• Manage the upgrades, handling the primary/secondary transitions.
