We now have two playbooks: one that updates the gcore nodes, and another one that upgrades the smartgears ones. The smartgears upgrade works on the nodes already configured and provided by ansible, and on the 'old' ones too.
The update of the smartexecutor plugin is also performed when that plugin needs to be present.

Commands that run the playbooks (examples that upgrade a single host):

```
./run.sh smartgears-upgrade.yml -i inventory/hosts.smartgears -l node78.d4science.org
```

```
./run.sh ghn-gcore-upgrade.yml -i inventory/hosts.dev -l node6.d.d4science.research-infrastructures.eu
```

The ghn version has changed and, consequently, the upgrade script for gCore based container has now another name. The new name is "upgrade-ghn-6-0-0.sh". Please, could you upgrade the ansible playbook to download the correct scripts from:
