**Description**

Right now every item has a URI like

https://openportal.isti.cnr.it/results?option=com_dnetindexclient&view=doc&id=people_____::bdd138a872d87ed2a018062f4bf2b325

we should have something like

https://openportal.isti.cnr.it/document/ID

I am wondering this can be done by some sort of "redirection rule"

I have already prepared an hidden menu item, as you can see here:

https://openportal.isti.cnr.it/doc?id=people_____::bdd138a872d87ed2a018062f4bf2b325

The next step should be to implement a simple rule to redirect:

https://openportal.isti.cnr.it/doc/ID in https://openportal.isti.cnr.it/doc?id=ID

I'm ready to provision the nginx configuration, but I'll do it when @michele.artini@isti.cnr.it is present so that we can immediately check if it works and nothing where broken.

I tried different combinations of URL rewriting, but nothing works: the rule that removes the index.php? part of the URL always invalidates all the previous rewritings.

I tried again all the possible combinations. The *URL beautify* functionality always breaks all the rewrite rules that I tried. The only way to obtain the behaviour you wan is to modify the URL from inside Joomla.
