| Target version: | UnSprintable | | |
| Infrastructure: | Development, Pre-Production, Production | | |
| Description | | | |
| Also, it puts the logs into the data directory. Better move them into the tomcat logs one. | | | |

History

#1 - Dec 05, 2018 07:18 PM - Andrea Dell'Amico

thredds uses log4j, the configuration is WEB-INF/classes/log4j2.xml and the threddsServlet part misses a DefaultRolloverStrategy entry. The file must become a template, and installed overwriting the original.

#2 - Dec 06, 2018 04:41 PM - Andrea Dell'Amico

- Status changed from New to In Progress

#3 - Dec 06, 2018 05:07 PM - Andrea Dell'Amico

- Status changed from In Progress to Closed

- % Done changed from 0 to 100

Done on all the instances. The log files are now located into /home/gcube/tomcat/logs/thredds/
