Description			
In example Sebastes mentella East Greenland (Subarea 27.14) Iceland Grounds (Division 27.5.a) by comparing the record in GRSF Admin http://data.d4science.org/ctlg/GRSF_Admin/48c8dc3c-2fd4-389c-8c01-e33dc22f6161 and the one in GRSF VRE https://i-marine.d4science.org/group/grsf/data-catalogue you can easily spot that source is missing as well as catches, fishing pressure, landings etc.			

History

#1 - Dec 12, 2018 12:37 PM - Yannis Marketakis

- Status changed from New to In Progress

The data published in the two VREs are exactly the same. You will see that Catches for example are included (under Stock Data Panel), however the corresponding resources (i.e. the CSV data have not been created for them).

@luca.frosini@isti.cnr.it or @francesco.mangiacrapa@isti.cnr.it can you check why?

The published records can be found at <https://goo.gl/XHfVvz>

#2 - Dec 12, 2018 12:39 PM - Yannis Marketakis

- File Catches.jpg added

#3 - Dec 12, 2018 04:00 PM - Francesco Mangiacrapa

- Assignee changed from Yannis Marketakis to Luca Frosini

We will fix the issue asap. @luca.frosini@isti.cnr.it is working to fix it

#4 - Dec 14, 2018 02:08 PM - Luca Frosini

- Status changed from In Progress to Closed

- % Done changed from 0 to 100

I made an automatic procedure to check the records which fixed the ones with missing information.
Everything should be ok now
