Target version:	Redmine management		
Infrastructure:	Production		

Description

Move the following installation from http://paste.research-infrastructures.eu/ to http://paste.d4science.org/ that is easier to write and remember.
Moreover I also suggest to discourage search engine to index it, to avoid external use, because we are now the 4th result on google

A robot.txt will eliminate it from the search results but that doesn't avoid the fact that it can be used by anybody. If we want internal users only we need to put it under authentication.

I know it, but at least they don't find it from search engine.

- Status changed from In Progress to Feedback

- % Done changed from 80 to 100

Added a robots.txt to exclude all the search engines spiders.

#6 - Nov 23, 2015 03:46 PM - Luca Frosini

Seem working, also the robots.txt seems corrclty configured. I'm going to announce the the url using VREs
