@gianpaolo.coro@isti.cnr.it @roberto.cirillo@isti.cnr.it any clues about a candidate date?

Since the system selects resources dynamically and currently there is no big job running, on my side you can do it anytime between now and end of January. Please coordinate with Roberto who is the supervisor of the production environment.

node41.d4science.org is not a smart-executor service, please remove this host from the list.  
After that, we could perform this upgrade today if you want or the next monday if you prefer. This upgrade doesn't need a downtime.

OK

Next monday is better. It's now late, if any problem occurs there is no time to fix them.
