

StocksAndFisheriesKB - Bug #16395

GRSF record titles are not updated

Mar 28, 2019 10:27 AM - Yannis Marketakis

Description			
We noticed the following while updating some GRSF records (see #16281#9)			
When updating a record, the title of the record (the heading) is not updated. In the JSON object we are submitting while updating (and publishing) records we do not have a specific field for the title. We supply the name (stock_name or fishery_name).			
If you check this record http://data.d4science.org/ctlg/GRSF_Admin/6306f86b-1987-3b60-89b4-e71c3d3981ce , you'll notice that although we have updated the fishery_name, the title of the record is still the previous one.			
Attached you'll find the submitted JSON for your convenience.

I think it is a Solr index issue.

Did you update the record yesterday or right now?

#3 - Mar 28, 2019 10:36 AM - Yannis Marketakis

I've updated around 400 GRSF records yesterday (including the one shown above)

I just checked the above record (id=6306f86b-1987-3b60-89b4-e71c3d3981ce) on SOLR index. It was updated correctly yesterday (see "metadata_modified" and the complete file attached):

```
"metadata_created": "2018-06-22T06:02:53.267005",  
"metadata_modified": "2019-03-27T17:05:02.658285",
```

The "Fishery Name" and "Short Name" fields have been updated, the 'Title' no.

@luca.frosini@isti.cnr.it I think is missing the mapping from GRSF source "fishery_name" to CKAN record "title" while updating the GRSF record.
Could you check? Thanks

Investigating the issue I found that the update methods have an explicit comment for this. For example:

```
// name, title, product url and are going to remain unchanged (so we keep them from the publisher record);
```

I'm going to change the behaviour setting to title the StockName or FisheryName.
