Description			
Similarly to what we did for Altmetrics, I would suggest integrating the Dimensions badge			
https://badge.dimensions.ai/			
It should be really trivial ... it is sufficient to embed the following code by taking care of inserting the DOI in the data-doi parameter. E.g. the following badge is about out paper https://openportal.isti.cnr.it/doc?id=people_____:08ef76448b9490722370f165e1dc6e5e			
<pre><script async src="https://badge.dimensions.ai/badge.js" charset="utf-8"></script></pre>			
I would use the compact view above for decorating the result set entries. While I would suggest using the following one for the per product page.			
<pre><script async src="https://badge.dimensions.ai/badge.js" charset="utf-8"></script></pre>			
In attachment how they have integrated the Altmetrics and Dimenions badge in their own web site.

- Status changed from New to Completed

I integrated the plugin, but I preferred to not consider the option

```
data-hide-zero-citations="true"
```

because the page was rendered with an empty box.
