All but one are still old:

- db2.p.d4science.research-infrastructures.eu: 9.04
- node3.p.d4science.research-infrastructures.eu: 8.04.1
- node5.p.d4science.research-infrastructures.eu: 8.04
- node10.p.d4science.research-infrastructures.eu: 8.04.4
- node12.p.d4science.research-infrastructures.eu: 12.04.5 <== This one is good
- node16.p.d4science.research-infrastructures.eu: 8.04.4

These nodes (EUBrazilOpenBio production) upgraded:

node3.p.d4science.research-infrastructures.eu migrated to 14.04
node5.p.d4science.research-infrastructures.eu migrated to 14.04
node12.p.d4science.research-infrastructures.eu migrated to 14.04
node16.p.d4science.research-infrastructures.eu migrated to 14.04
node34.p.d4science.research-infrastructures.eu migrated to 14.04

node10.p.d4science.research-infrastructures.eu (preprod) migrated to 14.04

node17.p.d4science.research-infrastructures.eu
more info needed to migrate this node, there is al old mysql DB.

db2.p.d4science.research-infrastructures.eu:

this is the statistical-eubrazilopenbio node, it seems to use the DB on db5.p.d4science.research-infrastructures.eu sub there is a local DB with the same dapabase of db5, I need to know if the local DB is still in use.

I guess, the statistical-manager service deployed in EUBrazilOpenBio Scope could be removed: [#3141](#)

Do you agree, @pasquale.pagano@isti.cnr.it @gianpaolo.coro@isti.cnr.it ?

#7 - Apr 11, 2016 11:36 AM - Gianpaolo Coro

Yes it can be dismissed.

#8 - Apr 11, 2016 12:34 PM - Gianpaolo Coro

db5.p.d4science.research-infrastructures.eu is used by the other Statistical Manager machines and should not be shut down
