Description

Hello,
I would like to use the GRSF API to query by a species scientific name. However, the link to the API reported in the GRSF VRE (https://i-marine.d4science.org/web/grsf), i.e. http://62.217.127.124:8080/grsf-api/ is broken.
Could you provide the correct link, please?

Further, are there any examples of querying by species name to retrieve the polygon or the geospatial extent of the fisheries?

Thanks

Yannis, can you look into this issue? It seems this service is hosted on your premises?

#2 - Jan 15, 2020 02:30 PM - Sara Garavelli

Thank you for your email.

I will be back at work on January 16. Until then I will have very limited access to my e-mail.

For urgent issues please contact info@trust-itservices.com.

Sara Garavelli

I've updated the GRSF-API url from the testing (and obsolete) one to the proper one: http://updater.grsf.d4science.org/grsf-api/
