

ISTI Open Access - Feature #19950

Reconsider the harvesting pipeline to benefit from "possibly richer" metadata records

Oct 12, 2020 08:46 PM - Leonardo Candela

Status:	Completed	Start date:	Oct 12, 2020
Priority:	Urgent	Due date:	
Assignee:	Michele Artini	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	ISTI Open Portal Issues		
Description			
We have been informed that metadata records made available by OAI-PMH have been revised thus to include the following information:			
<ul style="list-style-type: none">• metadata records are equipped with the dc:rights field<ul style="list-style-type: none">◦ many instances can be there ... we should check what strategy to follow here;• metadata records are equipped with two dc:types attributes ... one of them is the proprietary one used by CNR;<ul style="list-style-type: none">◦ we will leverage on this to discriminate among the so many diverse items classified like Others, in particular we should be able to identify Software, Dataset (Dataset and Banca Dati), and Training material• metadata records are equipped with a new dc:identifier field pointing to the publications.cnr.it splash page of the item;<ul style="list-style-type: none">◦ we should envisage a new "Repository" ... I would call it CNR_OAPub

I believe part of this request was already managed (@michele.artini@isti.cnr.it to check).

The missing part is the one about typologies ... we do have too many Other and Book :)

We have been informed that metadata records made available by OAI-PMH have been revised thus to include the following information:

- metadata records are equipped with the dc:rights field
 - many instances can be there ... we should check what strategy to follow here;

DONE.

- metadata records are equipped with two dc:types attributes ... one of them is the proprietary one used by CNR;
 - we will leverage on this to discriminate among the so many diverse items classified like Others, in particular we should be able to identify **Software**, **Dataset** (Dataset and Banca Dati), and **Training material**

DONE.

- metadata records are equipped with a new dc:identifier field pointing to the publications.cnr.it splash page of the item;

- we should envisage a new "Repository" ... I would call it **CNR_OAPub**

DONE. (the name displayed is **CNR ExploRA**)

#6 - Jul 03, 2021 11:26 AM - Leonardo Candela

- *Status changed from Feedback to Completed*

- *% Done changed from 10 to 100*

I would consider this activity complete now. the discussion on typologies continues in [#16772](#)
