Of course, I will correct those.

In addition, I will check why this happened.

FYI: I see that the corresponding legacy records were published properly (e.g.

http://data.d4science.org/ctlg/GRSF_Admin/f13a393f-80c7-3503-8780-bbdd9f5705e1),

- % Done changed from 0 to 10

The issue occurred during the importing of short names of GRSF records from the previous version of the knowledge base.

For some reason, these resources were imported without taking into account the proper encoding.

This is fixed now.

I'll update the aforementioned GRSF records, and search if there are others with the same issue.

- Status changed from In Progress to Closed

- % Done changed from 10 to 100

The records have been updated. They've been updated in both VRS (Admin and Public).
