Hi @bracken.vanniekerk@fao.org

Can you please take a look at row number 4. There seems to be a mismatch between UUIDs and original IDs there. More specifically, the UUID 4a6d8da7-b734-3f48-b430-e2ca68032313 refers to FishSource record with ID 892, instead of the ID 890 that is reported in other columns.

In addition, while progressing with the rest of the merges and approvals I encounter an error while updating them in the catalog. This blocks us so I will open a new issue (I'll cc you and Aureliano) asking CNR colleagues to check it out.

Thank you Yannis for your kind and swift action.

You are correct, it appears the following FishSource records are no longer assessed: Fishsource ID 890 (uuid 41bc7631-2d98-301f-8847-220f7040de6f) and FishSource ID 892 (uuid 4a6d8da7-b734-3f48-b430-e2ca68032313), these can remain in PENDING status.

The corresponding RAM record, RAM ID RAM ID MONKGOMNGB (uuid 0485e0f5-737f-30f9-9cfd-18590b237782), can be APPROVED.

Many thanks!

Thanks for the clarification.

I'll proceed with the merging and approval of records as soon as the issue with the publisher is resolved ([#20504](#))
