D4Science Infrastructure - Incident #2287

registry-publisher-1.2.6-3.10.1.jar still contains the broken log4j.properties

Feb 18, 2016 01:04 AM - Andrea Dell'Amico

Status:	Closed		**Start date:**	Feb 18, 2016
Priority:	Urgent		**Due date:**	
Assignee:	Roberto Cirillo		**% Done:**	100%
Category:	Application		**Estimated time:**	0.00 hour
Target version:	D4Science Infrastructure Upgrade to gCube 3.10.0			
Infrastructure:	Development, Pre-Production, Production			

Description

registry-publisher-1.2.6-3.10.1.jar as found in the smartgears 1.2.7-3.10.1 distribution still carry the log4j.properties file that breaks the log4j global configuration.

I've pushed a fixed version on the ansible git repository and I'm using that file to overwrite the original one so that we can proceed provisioning the dataminer nodes, while waiting for a proper fix.

The new smartgears-distribution version: 1.2.7-3.10.1, is now available on nexus. (repository gcube-staging).
This new version contains the registry-publisher 1.2.6-3.10.1 without the log4j properties file.
It also doesn't contain the library "common-smartgears-utils".

#4 - Feb 18, 2016 02:30 PM - Andrea Dell'Amico

Thanks. I removed the workaround from the playbook.
I cannot test it on the production dataminer, but I think we can test on a dev host when possible.
