I have added the support to assign the record to the group.

I have also created the group in Ckan catalogues (production GRSF,GRSF_Admin, GRSF_Pre and preproduction GRSF_Pre).

The records will be assigned to the group as soon as the new version will be deployed and the records will be published again.

Dear Luca,

(hope you had a pleasant summer),

Please, let me ask for a clarification:

I see you closed this ticket, indeed I see **Assessment Method** as **Group** in the catalogue, but this is empty although the information is available in

the records, for example here https://data.d4science.org/ctlq/GRSF_Admin/9b36373a-ea6d-336a-8e0d-567555080aa4
Maybe the Group will be populated at the next data refresh of the catalogue?

Yes, the environment and the code are ready. We need to wait for the next gCube release and the refresh of the catalogue.
