

StocksAndFisheriesKB - Bug #25116

Missing reporting Year in FAO stock status category

May 16, 2023 10:26 AM - Aureliano Gentile

Status:	New	Start date:	May 16, 2023
Priority:	Normal	Due date:	
Assignee:	Yannis Marketakis	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	GRSF		
<b>Description</b> Dear Yannis, We noticed that FAO stock status categories (in JSON "fao_categories") is only with <b>reference year</b> and modelled differently from abundance level or fishing pressure. The <b>reporting year</b> is missing both in the catalogue and in the API.  Example: <a href="https://data.d4science.org/ctlg/GRSF/5af07291-ae79-3600-94b3-46ebcb5bb36a">https://data.d4science.org/ctlg/GRSF/5af07291-ae79-3600-94b3-46ebcb5bb36a</a>  <a href="https://isl.ics.forth.gr/grsf/grsf-api/resources/getstock?uuid=5af07291-ae79-3600-94b3-46ebcb5bb36a&amp;response_type=JSON">https://isl.ics.forth.gr/grsf/grsf-api/resources/getstock?uuid=5af07291-ae79-3600-94b3-46ebcb5bb36a&amp;response_type=JSON</a>  I do not recall why it was configured like that, or if it is a bug.  In principle, all time dependent data should be with ref and rep years (when available).  Please, do you think it can be fixed?

Hi Aureliano,

Yes, you are right. FAO categories should be treated in a similar manner to other time-dependent information.  
I will update this.
