midPoint is way too much and way too complex for our needs. Better try a plain ldap manager:

<https://www.fusiondirectory.org/>

<https://oss.gonicus.de/labs/gosa/>

<https://www.ldap-account-manager.org/lamcms/>

I'm experimenting with fusiondirectory, reachable here: <https://ldap-d.d4science.org/fusiondirectory/>

The admin user is fd-admin, same password of the admin ldap user.

I'm adding additional groups under dn: ou=Groups,dc=d4science,dc=org so that we do not conflict with the portal generated groups.

It's working, I'm installing it on ldap.d4science.org too.

##### #6 - Jul 19, 2016 05:42 PM - Andrea Dell'Amico

- Status changed from In Progress to Closed

- % Done changed from 60 to 100

It's working. I just reconfigured redmine to use the new ldap redmine\_admins group as the administrators group.
