

D4Science Infrastructure - Task #317

manage.research-infrastructures.eu needs some love

Jun 26, 2015 06:26 PM - Andrea Dell'Amico

Status:	Rejected	Start date:	Jun 26, 2015
Priority:	Normal	Due date:	
Assignee:	Sandro La Bruzzo	% Done:	100%
Category:	System Application	Estimated time:	0.00 hour
Target version:	UnSprintable		
Infrastructure:	Production		

Description

The application needs a better look and lacks some basic functionalities. While waiting a more modern authentication platform, the following changes would be very welcome:

- Removal of the FP7 logo
- A better look (to be decided)
- The ability, for the administrators to remove users
- Move the admin password out of the source code (!). Read it from a local file
- The ldap server to contact should be a parameter, so that we can move the whole application to a more modern machine.

And, if it's not too difficult:

- Send the welcome email from the application, after choosing the email message text
- Give the ability to change the email templates from the interface.

History

#1 - Jun 26, 2015 06:27 PM - Andrea Dell'Amico

I forgot: the ability to bulk add users from a text file.

#2 - Jul 03, 2015 05:08 PM - Andrea Dell'Amico

Another problem I've just run into: it does not support UTF8. But could it be a LDAP encoding problem?

#3 - Mar 01, 2017 09:11 AM - Andrea Dell'Amico

- Status changed from New to Rejected

We will dismiss it as soon as the OpenAIRE VRE will be active and the users imported.
