@pasquale.pagano@isti.cnr.it , I just realised there will be an issue, in the upcoming Liferay 6.2 portal, if we name the development portal instances as we did in with devnext.d4science.org, devsec and preprod (with the exact name of a VO or VRE).

In the upcoming Liferay 6.2 portal to handle multiple Sites (iMarine, Services, Descramble etc) in a single Liferay database with virtual host, we cannot have a virtual host that begins exactly with the name of a VO or VRE. I can provide with more details on this but this is a constraint.

May I suggest, to create these aliases as follows?

- dev.d4science.org as staging.d4science.org
- dev3.d4science.org as next.d4science.org
- preprod.d4science.org as pre-production.d4science.org

@tommaso.piccioli@isti.cnr.it please create aliases as follows and remove the previous ones (devnext.d4science.org and devsec.d4science.org)

- dev.d4science.org as staging.d4science.org (was devsec.d4science.org)
- dev3.d4science.org as next.d4science.org (was devnext.d4science.org)

- this is new: preprod.d4science.org as pre-production.d4science.org

**#6 - Apr 21, 2016 04:16 PM - Tommaso Piccioli**

Done:

staging.d4science.org is an alias for dev.d4science.org

next.d4science.org is an alias for dev3.d4science.org

pre-production.d4science.org is an alias for preprod.d4science.org

I removed the aliases:

devnext.d4science.org

devsec.d4science.org
