D4Science Infrastructure - Task #362

Limit HTTP Method on accounting-d4s.d4science.org

Jul 08, 2015 12:31 PM - Luca Frosini

Status:	Closed		**Start date:**	Jul 08, 2015
Priority:	Low		**Due date:**	Dec 31, 2016
Assignee:	_InfraScience Systems Engineer		**% Done:**	100%
Category:	Application		**Estimated time:**	0.00 hour
Target version:	Enhance Accounting Security			
Infrastructure:	Production			

Description

Only HTTP PUT Method should be allowed on accounting-d4s.d4science.org:5984 for the whole internet.

All the other HTTP methods for the moment must be allowed only for ISTI infrastructure. As soon as the Accounting will be fully operational, as Andrea Dell'Amico suggested we can use a different hostname for that machine and allow the access only from a limited predefined number of host (e.g. portals, ISTI network).

Do you need this now? It can be done putting an haproxy instance in front of couchdb, and that's the plan for the production release.

I don't remember anything about the hostname change, btw.

#2 - Jul 08, 2015 04:33 PM - Luca Frosini

No, I don't need it now. It is not urgent.

We discussed about to have only the PUT method accessible from everywhere for accounting-d4s.d4science.org URL and using a a different hostname (with the same haproxy instance or with a different one in different machine) for the whole CouchDB functionality (web access for admin as well).

I think this should be done when we will have a cluster and haproxy installed.
I opened a ticket just as reminder for both.

The accounting is switching to CouchBase so the ticket became invalid. For this reason I set to Rejected
