<b>Description</b>			
It seems that the stats, toptopics and whatsnew fail to load in FAo TA.			
It says "report issue" I duly oblige			

#### History

##### #1 - Apr 20, 2016 03:35 PM - Massimiliano Assante

- Tracker changed from Support to Incident
- Category set to Other
- Assignee changed from Massimiliano Assante to Valentina Marioli
- Priority changed from Normal to Urgent

Stats was not deployed in FAO\_TunaAtlas VRE, now it is. Top Topics is not shown because there aren't topics at all in FAO\_TunaAtlas VRE. While Recent Documents is broken, I'm assigning the ticket to @valentina.marioli@isti.cnr.it

##### #2 - Apr 20, 2016 03:40 PM - Valentina Marioli

- Status changed from New to In Progress

##### #4 - Apr 20, 2016 05:38 PM - Valentina Marioli

- Status changed from In Progress to Closed
- % Done changed from 0 to 100

The issue is due to some missing files:

- IOTC-2015-WPTT17-DATA07- CECOastal.csv
- IOTC-2015-WPTT17-DATA06- CESurface\_rev1.csv

A ticket about the file "IOTC-2015-WPTT17-DATA06- CESurface\_rev1.csv" was already opened by Anthon one month ago:  
<https://support.d4science.org/issues/2347>.

Also the file "IOTC-2015-WPTT17-DATA06- CESurface\_rev1.csv" suffers from the same bug, because they were created/updated at the same time.

In the previous ticket, we asked to replace such files, but they are still broken, so I'm going to remove them to avoid other problems.
