Description

It is needed to create a new Group on Ganglia named "D4Science SDI" with the following services:

1. geonetwork.d4science.org

2. geonetwork.geothermaldata.d4science.org
3. geoserver.d4science.org
4. geoserver2.d4science.org
5. geoserver3.d4science.org
6. geoserver4.d4science.org
7. thredds.d4science.org
8. wps01.i-marine.d4science.org

wps01.i-marine.d4science.org is not inside our data center. I have no access to it and it will not be able to join the multicast group. If we really want it in the cluster I'll have to rework the configuration to work over unicast.

The cluster is active, http://monitoring.research-infrastructures.eu/ganglia/?c=D4Science%20SDI&m=load_one&r=hour&s=by%20name&hc=4&mc=2 with all hosts listed other than wps01.i-marine.d4science.org.

Sorry, maybe it was my mistake to ask for WP01 as well. @gianpaolo.coro@isti.cnr.it to reopen the ticket either to report if WP01 is needed int his cluster or to report other SDI services to add.
